

Flexible Embedded Controller for Many Print Environments

Fiery® System 8e delivers outstanding performance, seamless network integration, high color quality and complete security to productive office, creative and print-for-pay environments. The flexible embedded controller offers powerful standard features that provide exceptional usability, simplified workflow, comprehensive color management and support for variable data printing (VDP). It also provides additional options to meet users' growing needs.

High Productivity

The robust system uses Fiery Smart RIP technology, productivity tools and logical workflows to achieve high performance in any office setting. Intelligent processing with Fiery Smart RIP accelerates RIPing, ensuring the fastest speeds possible and dramatically speeds printing of Microsoft Office and Adobe applications by recognizing bottlenecks and providing an intelligent path through the image and graphic rich files that slow non-Fiery devices. Smart RIP software simply uses a given hardware configuration more intelligently. The Fiery RIP-and-Print utility drives up to 30 percent more pages on printing devices, per time period, in demanding environments.

Flexible Business Features

EFI Desktop SE allows users to instantly organize, manage, find and share all of their paper and digital documents. Files can be easily viewed, managed and shared with anyone, anywhere in any format, including PDF, by simply dragging and dropping files. The optional EFI Desktop Pro extends Desktop SE functionality with OCR and format retention capabilities.

Fiery Netwise adds Web connectivity for printing via the Internet and provides the ability to perform administrative tasks through email. With Fiery Bridge, users can connect to the Fiery from their native Windows file directory and interact seamlessly with their standard Windows experience. Fiery Bridge empowers users with the ability to view/manage all personal jobs stored on the Fiery with drag and drop ease. The Fiery WebTools provides remote management over the Internet or Intranet through Java enabled Web browsers.

Comprehensive Security

With the explosion of viruses and security breaches, protecting vital information is important. With Fiery® Security features and options, EFI™ provides a complete toolset for administrators to cover all aspects of document and device security. This toolset represents the widest range of security measures in the print industry. Administrators can set general authentications, disable network ports and services, set IP filtering, and support anti-virus software. The optional EFI Secure Erase enables users to remove electronic data and latent file images stored on the Fiery hard drive.

Options to Meet Growing Needs

Optional applications such as EFI Hot Folders and Virtual Printers take automated printing to the next level. Users can "drag & drop" files into hot folders that are preconfigured to print the job for guaranteed results or to virtual printers that appear as network printers.

EFI Color Profiler Suite allows you to successfully create, visualize, test and edit color profiles with a single profiling solution. Imposition and booklet making are standard Fiery features through the driver. Additionally, EFI Impose, Fiery Edition provides advanced WYSIWYG booklet and imposition capabilities, adding flexibility and functionality to System 8e.

Consistent Color

Fiery System 8e features Fiery ColorWise® with standard-setting color tools and increased user flexibility. Fiery ColorWise delivers great "out of the box" color that is consistent across applications, computer platforms, color spaces, and color file formats. It also provides automated functionality and expert-level controls for managing color, productivity and workflow.

Fiery® System 8e

SERVER & CONTROLLER SOLUTIONS

EFI's portfolio of integrated solutions increases productivity and improves your bottom line. Find out more at www.efi.com.

Specifications

Fiery System Software

- Fiery System 8e Release 2

Fiery Utilities

- EFI Driver
- EFI Desktop SE
- Command WorkStation (Windows and Macintosh Editions)
- EFI Fiery WebTools
- Fiery ColorWise®

Fiery Options

- EFI Desktop Pro
- EFI Graphic Arts Features
 - EFI Spot-On (includes Substitute Colors)
 - Auto Trapping
- EFI Hot Folders/Virtual Printers
- EFI Impose Fiery Edition
- EFI Color Profiler Suite
- PrintShop Mail-Fiery Version
- Pageflex Persona-Fiery Version
- EFI Secure Erase
- Fiery Driver for Unix (OEM Option)

Hardware

- X3e-TM:
 - Transmeta Processor
 - 1.0GHz
 - 256MB RAM
 - 0-80GB Hard Drive
- X3e-TY:
 - Intel Celeron Processor
 - 2.0+ GHz
 - 256+MB RAM
 - 20-80GB Hard Drive
- X3e-IM:
 - Intel Celeron M* Processor
 - 1.2/1.5 GHz
 - 256+MB RAM
 - 20-80GB Hard Drive
 - Fastest Available Processor
- Fiery Smart RIP
 - EFI Video Interface Card
 - Fiery RIPChips™
 - ECT Compression

Networking/Connectivity

- LDAP support
- Exchange, Novell, Domino LDAP v3/RFC2251
 - Email address access and authentication
 - User password validation
- Certificate Management
 - SSL/TLS
 - X509 Standard
- IP Sec Support
- IPv6 Support
- Simultaneous Autoswitching Protocols
- EtherTalk II
- TCP/IP
- Novell iPrint
- Autosensing Ports
- RJ45 for on-board 10/100/1000 Base-T and 10/100 Base-T
- Automatic IP configuration SNMP Printing Support
- AppleTalk
- Mac Bonjour
- SMB (peer-to-peer)

Safety

- CE Mark
- CSA
- TUV/GS
- UL
- CB Scheme
- EMC
- EN55022 Part B (CE marked)
- FCC Class B
- RoHS
- VCCI II

Power Supply and Consumption

- Auto Switching Power Supply with active PFC
